Portfolio Website PRD — Edison, Data Analyst

Nov 7, 2026 · @Rishabh

A single-page portfolio website that presents Edison as a job-ready Data Analyst and gets recruiters to open his projects and contact him within one minute of landing.

1. Overview

Product: a personal portfolio site for Edison, a B.Tech CSE student (2024–2028) and two-time Data Analyst intern based in Lucknow, India.

Problem: a PDF resume lists skills but cannot show dashboards, analysis quality or communication ability. Recruiters and hiring managers decide in seconds, and Edison's strongest evidence (Power BI dashboards, measurable results) is buried in text.

Solution: a fast, visually polished site, modelled on the inspiration layout (big greeting, bold name headline, stat counters, project cards), that puts his results and live work first.

Goals

1. Win internship and entry-level Data Analyst interviews by showing proof of work, not only a skills list.
2. Make every project explorable: problem, approach, tools, result, link to GitHub or live dashboard.
3. Give visitors one clear action: Contact, Download Resume, or LinkedIn.
4. Look as polished as the inspiration site while staying lightweight and quick to load.

Success metrics (first 90 days after launch)

Metric	Target
Largest Contentful Paint	under 2.5 s on mobile 4G
Lighthouse score (Performance, Accessibility, SEO)	90+ each
Resume downloads	30+
Contact form or email clicks	15+
Project card click-through	40% of visitors open at least one project

Metric	Target
Average time on page	over 60 s

Non-goals (version 1)

- No blog, CMS or user accounts.
- No paid hosting or backend database.
- No multi-language support (English only for now).

2. Target audience

The site serves three visitors, in this priority order. Each wants proof within the first screen.

Persona	Who they are	What they need	How the site serves them
Recruiter / HR	Screens dozens of profiles a day, often non-technical	Role, location, key skills, results, resume	Hero with role and "Available for new opportunities" badge, stat counters, Download Resume button
Hiring manager / senior analyst	Technical, judges depth and method	Tools used, project approach, quality of dashboards and code	Project cards with problem, method, tools, result and GitHub link; skills grouped by category
Peers, mentors, collaborators	Students, community members, freelancers	Who he is, how to connect	About section, LinkedIn and GitHub links, contact form

Primary device: mobile first. Recruiters often open a LinkedIn link on a phone, so every section must work at 375 px width.

3. Design direction

The look is warm, clean and editorial: a soft peach-to-butter gradient behind a large portrait, a huge condensed name headline, and an elegant italic serif greeting. It copies the *structure and feel* of the inspiration site, not its brand name, text or images.

What we take from the inspiration

- Hero: italic serif "Hey, there" over the portrait, a giant bold "I AM EDISON" headline, role label on the right, small intro line, and an "Available for new opportunities" pill.
- Black pill-shaped Contact button in the top-right of a minimal navigation bar.
- Centered, all-caps section titles, generous white space and large rounded image cards.
- Stat counters (big number plus small label) and a clean table-style Experience & Skills list.
- Soft warm gradients behind sections, with thin divider lines.

Color theme

Role	Name	Hex	Used for
Background	Warm White	#FFFBF5	Page background
Gradient start	Peach	#FFD9B0	Hero and section gradients
Gradient end	Butter	#FFF1C9	Hero and section gradients
Accent	Amber Orange	#F58A1F	Badges, highlights, chart bars, hover states
Ink	Near Black	#0E0E10	Headlines, buttons, nav
Body text	Charcoal	#3A3A3F	Paragraphs
Muted	Stone	#8A8A90	Labels, dates, captions
Data accent	Deep Teal	#1F6F78	Secondary series in charts, links on cards

Text on Warm White uses Near Black or Charcoal only, which gives a contrast ratio above 7:1. Amber Orange is never used for small body text.

Typography (all free on Google Fonts)

Use	Font	Style
Big headlines (I AM EDISON, section titles)	**Anton**	Uppercase, tight line height (0.95)
Greeting and accent words	**Instrument Serif**	Italic, large (80–140 px desktop)
Body, navigation, labels	**Inter**	Regular 400 and Medium 500, 16 px base
Numbers and code-like labels	**JetBrains Mono**	Used sparingly for tool tags and stats

Imagery

- **Your portrait:** the supplied photo has a busy outdoor background with a bright sky. For the hero, cut the subject out (any background-removal tool) and place him on the peach gradient, as the inspiration does. Crop from the chest up, keep the checked shirt, and export as a transparent PNG or WebP at 1600 px tall.
- **Fallback:** if no cutout is available, use a rounded-rectangle or arch-shaped photo card (radius 32 px) beside the headline.
- **Project visuals:** real screenshots of the Zepto Power BI dashboard and the agriculture analysis charts inside rounded device or browser frames, matching the inspiration's phone-mockup cards.
- **Workstation gallery (optional):** 3–4 photos of his desk or setup, in rounded cards like the inspiration's "My Workstation" row.

Motion and interaction

- Hero text fades and slides up on load (400–600 ms).
- Stat counters count up once when scrolled into view.
- Project cards lift slightly on hover; the Contact button inverts to amber.
- Respect the "reduce motion" setting by turning off all animation.

4. Site structure and content

Version 1 is one scrolling page with a sticky navigation bar that jumps to each section. Sections appear in this order:

1. Hero

2. Stats strip
3. About
4. What I do
5. Recent projects
6. Experience & skills
7. Certifications
8. Contact and footer

Navigation links: **Home · Projects · About · Skills · Contact**, plus a black **Contact** pill button and a **Resume** link.

4.1 Hero

- Italic serif greeting: *Hey, there*
- Headline: **I AM EDISON**
- Role label (right side): **DATA ANALYST**
- Intro line: "Data Analyst turning raw, messy data into dashboards and recommendations that decision-makers can act on. Specialized in Python, SQL, Power BI and Tableau."
- Badge: "Available for new opportunities" with a pulsing amber dot
- Buttons: **View Projects** (primary, black) and **Download Resume** (secondary, outlined)
- Social icons: LinkedIn, GitHub, Email
- Portrait on peach gradient (see Imagery)

4.2 Stats strip

Big numbers with small labels, counting up on scroll. All figures come from the resume.

Number	Label
10,000+	Records analyzed
20%	Sales increase from delivered insights
25%	Faster decision-making
15%+	Faster SQL query execution
2	Data Analyst internships

4.3 About

- Heading: **ABOUT ME**
- Copy: "I'm a B.Tech Computer Science & Engineering student (2024–2028) at Dr. Shakuntala Misra National Rehabilitation University, Lucknow, and a two-time Data Analyst intern. I turn raw, messy data into dashboards and recommendations that decision-makers can act on, using Python, SQL, Power BI (DAX), Tableau, ETL and Excel."
- Details row: Location Lucknow, India · Languages English, Hindi · Education B.Tech CSE, 2024–2028
- Education note: coursework and projects in statistical analysis, data visualization and predictive modeling; built KPIs and dashboards for performance tracking.

4.4 What I do (replaces the inspiration's "Services" row)

Four numbered cards (01–04), each with a one-line description:

No.	Card	Description
01	Data cleaning & ETL	Turning raw, messy datasets into reliable, analysis-ready tables
02	Dashboards & BI	Interactive Power BI (DAX) and Tableau dashboards with KPI reporting
03	SQL & query optimization	Complex analytical queries in MySQL, tuned for speed
04	Analysis & insights	Exploratory and statistical analysis in Python (Pandas, NumPy, Matplotlib, Seaborn)

4.5 Recent projects

Heading: **RECENT PROJECTS**. Two large rounded cards side by side (stacked on mobile), each opening a detail view or modal.

Project 1: Zepto Monthly Sales Dashboard (2026)

- Tools: Power BI, Excel
- What it is: an interactive dashboard covering monthly revenue drivers, regional demand and product-category breakdowns.
- Result: surfaced $6M+ in monthly revenue across top product lines; identified Hyderabad, Pune and Bangalore as top regions with 14,000+ orders.
- Links: GitHub; dashboard screenshots

Project 2: Seasonal Agricultural Performance Analysis (2026)

- Tools: Python, AWS
- What it is: analysis of seasonal crop performance to maximize profit.
- Result: Kharif crops showed 30–50% higher profit than Rabi and Zaid; Kharif output of 5.6 tons+ and average revenue of 7 lakh+, giving a clear crop-planning recommendation.
- Links: GitHub; chart screenshots

Each card shows: cover image, title, tool tags, one-line result, and a "View project" arrow. The detail view uses the structure **Problem → Approach → Tools → Result → Links**.

4.6 Experience & skills

Heading: **EXPERIENCE & SKILLS**. Rows in the inspiration's table style: date, role, details or tools.

Dates	Role	Highlights
Aug 2026 – Sep 2026	Data Analyst Intern, BharatCares (Remote)	Cut SQL query execution time by 15%+; ran the full analysis cycle from cleaning to insights, speeding decisions by 25%; insights contributed to a 20% sales increase; built analyses and visualizations in Python
Aug 2026 – Sep 2026	Data Analyst Intern, Edunet Foundation & VOIS (Remote)	Analyzed 10,000+ records with Python and Excel (cleaning, visualization, problem-solving); supported decisions that contributed to a 15% boost in operational efficiency

Skills, grouped as tag chips:

Group	Items
Analysis & BI	Power BI (DAX), Tableau, Excel, ETL, KPI dashboards & reporting, EDA, data cleaning, statistical analysis, data visualization
Programming	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL), JavaScript, HTML, CSS

Group	Items
Tools	Git, GitHub, AWS
Soft skills	Communication, Problem Solving, Teamwork, Time Management

4.7 Certifications

Four badge cards: IBM SkillsBuild (Data Analytics with AI Internship), VOIS for Tech University Engagement Program, Deloitte Data Analytics Job Simulation, TATA Forage AI-Powered Data Analytics Job Simulation.

4.8 Contact and footer

- Heading (italic serif + bold): *Let's work* **TOGETHER**
- Short line: "Open to Data Analyst internships and entry-level roles. Send me a message and I'll reply quickly."
- Contact form: name, email, message, Send button
- Direct links: mredison483@gmail.com · +91 81760 55441 · LinkedIn (linkedin.com/in/mr-edison-992047343) · GitHub (github.com/master90ed)
- Footer: "Edison. Data Analyst" wordmark, Lucknow, India, copyright line, back-to-top arrow.

5. Functional and technical requirements

Functional requirements

ID	Requirement	Priority
F1	Sticky navigation with smooth-scroll links and an active-section highlight	Must
F2	Hero with portrait, headline, role, badge, and two call-to-action buttons	Must
F3	Download Resume button that serves the current PDF	Must
F4	Animated stat counters that run once when scrolled into view	Should

ID	Requirement	Priority
F5	Two project cards, each opening a detail view with problem, approach, tools, result and links	Must
F6	Skills shown as grouped tag chips	Must
F7	Contact form with name, email and message, validation, and a success message	Must
F8	Direct links to email, phone, LinkedIn and GitHub	Must
F9	Embedded or screenshot view of the Power BI dashboard in the Zepto project	Should
F10	Light animations that switch off when the visitor prefers reduced motion	Should
F11	Dark mode toggle	Could
F12	Add-new-project structure so future projects need only a content entry, not new code	Should

Non-functional requirements

Area	Requirement
Performance	LCP under 2.5 s on mobile 4G; images in WebP, lazy-loaded below the fold; total page weight under 1.5 MB
Responsive	Works from 360 px to 1920 px; mobile layout stacks the hero, with the headline above the portrait
Accessibility	WCAG 2.1 AA: keyboard navigation, visible focus, alt text on every image, 4.5:1 text contrast
SEO	Title "Edison
Browser support	Latest two versions of Chrome, Edge, Safari and Firefox
Privacy	No tracking cookies; use a privacy-friendly analytics tool such as Plausible or the free tier of Google Analytics with a short notice
Security	HTTPS only; contact form protected against spam with a honeypot field or CAPTCHA

Suggested tech stack

- **Simple route (recommended):** HTML, CSS and vanilla JavaScript, or Next.js with Tailwind CSS. It uses skills Edison already lists (HTML, CSS, JavaScript) and costs nothing to host.
- **No-code route:** Webflow or Framer, matching the inspiration's style, if speed matters more than control.
- **Hosting:** Vercel, Netlify or GitHub Pages (free), with a custom domain such as edison.dev or edison-analyst.com.
- **Contact form:** Formspree, Web3Forms or Netlify Forms, with no server needed.
- **Charts on project pages:** screenshots first; later add interactive charts with Chart.js or a published Power BI link.
- **Version control:** the existing GitHub account, with the repo kept public as an extra proof of work.

6. Assets, timeline, risks and open questions

Assets to prepare

- [ ] Portrait cutout on transparent background (from the supplied photo), plus a cropped square version for the Open Graph image
- [ ] Resume PDF, with the same name and details as the site
- [ ] 3–5 screenshots of the Zepto Power BI dashboard
- [ ] 3–5 charts or screenshots from the Seasonal Agricultural Performance Analysis
- [ ] Links to both GitHub repositories (and a README for each with the problem, method and result)
- [ ] Certificate images or verification links for the four certifications
- [ ] Favicon and a short wordmark ("Edison." in Instrument Serif italic, matching the inspiration's logo style)
- [ ] Optional: workstation photos

Delivery plan (4 weeks)

1. **Week 1, Content and design:** finalize copy from this PRD, collect assets, build the hero and style guide in Figma.
2. **Week 2, Build:** code the page sections, navigation and responsive layouts.
3. **Week 3, Features and polish:** project detail views, contact form, animations, SEO tags, accessibility checks.

4. **Week 4, Test and launch:** device testing, Lighthouse fixes, connect the domain, publish, then add the link to LinkedIn, GitHub and the resume.

Risks and fixes

Risk	Impact	Mitigation
Portrait cutout looks rough on the gradient	Hero looks unprofessional	Use a clean cutout tool and soften the edges, or fall back to the rounded photo card
Only two projects	Section feels thin	Add a third project soon (for example a SQL or Tableau case study) and structure the page to take more cards
Large images slow the page	Lower SEO and higher bounce	Compress to WebP, lazy-load, set fixed image sizes
Copying the inspiration too closely	Looks unoriginal	Keep the structure, but use own colors, copy, project images and wordmark
Claims that cannot be checked	Reduces trust	Link each result to a project, repo or certificate where possible

Open questions

- Both internships are listed as Aug 2026 – Sep 2026. Are the dates correct, or should one of them be different?
- Is the portrait cutout acceptable, or should the hero use a framed photo?
- Which domain name should the site use?
- Can the Power BI dashboard be published publicly, or should the site show screenshots only?
- Does Edison want a dark mode in version 1?
- Should the phone number appear publicly, or only the email and the contact form?
